Western Larch Tongue & Groove V-Joint

Profile TGV

Measurement	Exposed Face
25 x 150mm (18 x 142mm)	145mm (137mm) 95mm (87mm)
25 x 100mm (18 x 92mm)	

Grade Sawn Falling

Grading Description

Canadian Western Larch (*Larix occidentalis*) is a strong, durable, and naturally rot resistant softwood, highly valued for outdoor applications like cladding and decking.

The heartwood is pale reddish-brown to a distinct brick red, while the narrow sapwood is whitish. It has a straight, fine grain and a slightly oily appearance.

Recommended Fasteners
